

SIT111 - TASK 3.4P

A) I have submitted ten tasks including (1.1P, 1.2P, 1.3P, 2.1P, 2.2P, 2.3C, 3.1P, 3.2C, 3.3D and 3.4P) all the task is completed and turned in the google classroom. There is no any overdue task since I have submitted all on time.

B) As I have mentioned I usually work hard as how I have mentioned to achieve the expected grade, also I do self-study by researches and exploring new technology. So far, I also engage myself in this module in my weekends which make me enjoy doing it. I do engage myself in reading books related to computer systems and revising my old school books, I do practice in the hardware simulator as I have mentioned to have hands on engagement.

C) So far as I know I have done almost the 98% of what I have mentioned as in the 1.1P but the only this which I have missed in the mentioned was I missed exploring by allocating time for it.

D) To overcome it I engage a separate time in my time table to explore and engage in module related activity.

E) I was encountering a health issue like flu which made me difficult to focus on studies. This set me back in my progress in my studies. Also faced a huge headache where I had to consult a doctor since I have a habit of staying awake at night for study purpose, which had a back draw in my study progress.

F) I have a time table for my studies, sleep and for my personal work which I have dedicated for each task of mine. These will help me eliminate and overcome these challenges which I faced recently.
